Komcept Solutions Ltd

## **The Company**

Komcept Solutions innovate to secure you today and protect your tomorrow.

## **Vision and Strategy**

To provide for the wide range of security needs of organisations. Providing bespoke security solutions, facilitating the evolving and complex needs of our customers and our commitment to ensure continuous and comprehensive support.

We constantly innovate and evolve our own products with a rapid development strategy including continual research and product improvement. We develop strategic relationships with key partners and continue to learn from and adapt to their operational requirements.

## **Company Culture**

Our success is built upon the efforts of our employees. We value our employee family who help build our innovative, market-leading products and services, and deliver robust, personal support to our clients. They do this through collaboration with one-another and with our customers, in an open and friendly workplace. We appreciate initiative and autonomy whilst encouraging staff to work together in order to support each other. We have a fail-fast approach to realise any show-stopping tasks early, and learn from this to improve and evolve development cycles.

## **The Opportunity**

We are seeking a network and infrastructure engineer to provide first and second-line support on customer systems, and maintain our own and remote customer systems. You'll receive a competitive salary and have regular personal development interaction with your manager and be encouraged to improve your range of skills through mentoring as well as training both in house and third party. Exceptional input and actions are recognised and rewarded in this company such as our Class-A share reward scheme.

## **Job Description – Network & Security Engineer**

This role will involve occasional foreign travel to customer sites, and be based in our offices in the UK, near Northampton.

The role includes building and maintaining infrastructure on customer platforms and provide support to system administrators of our systems. The role will require configuration of switches and firewalls including the configuration of high availability protocols used within them, Stacking and HSRP/VRRP.

There is ample opportunity to grow and progress through the business, learning new skills and diversifying in role. The role will suit someone with a broad interest in all aspects of IT, including hardware, software and OS.

The ideal candidate will be organised and pragmatic, as the role is sometimes customer facing, the candidate should have clear communication skills and be presentable. The role is 100% office based and due to location would be preferable for the candidate to hold a full driving license.

### **Essential**

- Strong networking experience with multi-vendor switches/firewalls
- Strong computer networking understanding and ability to troubleshoot
- Familiarity with Routing technologies and SDWAN Overlays
- Valid passport (or ability to obtain one)

### **Desirable**

- DBMSs (MySQL and/or MSSQL)
- Cloud Technologies with an emphasis on security and stability
- VCenter, VSphere
- Conversational language Spanish/French/Portuguese
- Operating systems including Linux, Ubuntu
- IP cameras, base stations, VOIP phones
- Internet of Things protocols, (MQTT and/or LoRaWAN)
- Hardware (servers, desktops, laptops, mobile phones)
- Delivering virtual and face to face training to users of varying technical abilities

Should be confident with documenting methods for undertaking tasks.

Role is permanent, expected salary £35-45k
